DRUGLOO
INTERNATIONAL

NORTH AMERICA

Portable | Sanitary | Discreet

Compact enough to be transported in a light van or car, this unit is battery powered with built-in water and waste tanks. It can be easily deployed and used where no water, electrical or waste services are available.

'Hands free' washing and recovery system similar to that used in the Drugloos Evolution. This provides the maximum protection to the operator while allowing all the recovered items to be sterilized prior to recovery.

PROTECT THE HEALTH & SAFETY OF YOUR OFFICERS

Protect and prevent the spread and exposure to harmful diseases such as

Coronavirus - Hepatitis - AIDS - STD's

Action:

This unit is completely self-sufficient as it has its own power (12v battery) and water which is stored in two water tanks at the side of the unit. The unit washes the items and the bad/dirty water is sent to a waste tank in the bottom of the unit.

The battery will last for up to 35/45 washing cycles.

Each unit has manacle points for hands and feet -see images.

Installation:

No installation is required for a Drugloo Ranger and induction is generally done via a video presentation and a live video link if required. We can also arrange for a personal induction by one of our engineers at an additional cost should you wish.

Technical Support:

Drugloo unit are designed to be extremely robust, built from the highest quality components and manufactured in grade 316 stainless steel. They are also rigorously tested before shipping and you have a full 1-year manufactures warranty. This covers everything except misuse and/or abuse. If there are any issues then we provide support via

phone and also video link. We also have units being built in the factory all the time so can give live demonstrations via Zoom or Teams.

DL6

All Drugloo units use a substance called DL6 which is an anti-microbial disinfectant which is specially developed for use in Drugloo units. The liquid has been de-foamed and unlike all other alternatives is not caustic and/or abrasive so will not damage the inner workings of the pipe work and diaphragms within the Drugloo unit. Each unit come with 10 Liters and there is an option to purchase more from Secure Technology Value Solutions.
